

"The way we talk to our children
becomes their inner voice!
children are mirrors.
when they are in the presence of love,
that's what they reflect.
when love is absent
they have nothing to give out."

"Education should not be
preparation of life;
It should be life."

"We should teach children
the way they learn,
rather than, expecting them
to learn the way we teach."

"**Everybody is a genius**
but if you judge a fish by
its ability to climb a tree,
it will live its whole life
believing it is stupid."

"There are two educations;
the one that teaches how
to make a living
and the other that
teaches how to live."

"Fair doesn't mean giving
every child the same thing;
it means **giving every child**
what it needs."

International Preschool and Learning Center

Jumpstart

Our Vision

We are a team of **highly motivated individuals**, managing the most preferred chain of preschools in early childhood education by engaging the children in **experiential learning** and with the **usage of the latest technology**. We **partner with the parents** and treat them as active participants in the development of their children resulting in creation of an unyielding foundation for the children to carve out their future.

Our Mission

The mission at **Jumpstart International Preschool, Learning Centre and Activity centre** is to focus on the holistic growth and development of the child and to provide quality education to the children and to provide a safe and nurturing environment where the **children are comfortable to learn in**.

We endear

We at Jumpstart believe that every child is unique and special in their own little ways. Each of them is a blessing to our society and we endear them the way they are.

We enlighten

We at Jumpstart affirm that children are tomorrow's future and need to be given the right knowledge at the right time. Preserving their different learning styles and pace we enlighten them to become better global citizens.

We enliven

Children are a treasure house of sympathy, kindness, generosity, curiosity, love, innocence and happiness. Our effort at Jumpstart is to enliven our children to unlock this treasure.

HOW DO WE HELP YOU FIND THE STAR IN YOUR CHILD ?

“A good teacher can inspire hope, ignite the imagination, and instill a love of learning.”

-Brad Henry

Every child is unique has a different way of learning. We can help find star in your child by facilitating and empowering the child with the guidance from a passionate teacher.

Teachers create the first impression of the outside world on your child.

Teachers at Jumpstart are ECE qualified with true devotion towards teaching. Constantly in service training and workshops ensure that they are kept abreast with the best global practices.

Student : Teacher ratio

Student : Teacher ratio of 10 :1 for individual attention.

Non teaching Staff

Non teaching staff at Jumpstart is loving, caring and helpful. We make utmost efforts to maintain hygiene standards for them. e.g Regular health check up is done along with neatly washed uniform is also worn by them .

We endear, enlighten and enliven the children to make them the STARS of tomorrow

Education philosophy

It has been globally acknowledged that the first five years of a child's life are the most critical years for lifelong development as the pace of development in these years is extremely rapid. It is therefore very important to give the right knowledge and exposure to the children during these formative years as they form the foundation for inculcation of social values and personal habits which are known to last a lifetime.

What follows logically therefore is the crucial importance of investing in these early years to ensure an enabling environment for every child and thereby a sound foundation for the life, which is not only the right of every child but which will also impact, in the long term, the quality of human capital available to a country.

Experiential Learning

(John Dewey)

Experiential learning is the process of learning through experience, and is more specifically defined as "learning through reflection on doing". Hands-on learning allows children to experience and learn concepts and things through observation and interaction during the experience. Jumpstart ensures that the child learns experientially when in school. It has more than 50 experiential events conducted throughout the year to give varied hand-on experiences to the children. Children learn by doing and being part of these elaborate events which cumulate learning across various topics and sections.

Overall development:

- Physical development
- Language development
- Cognitive development
- Emotional development
- Social development
- Moral development
- Creative development
- Spiritual development

We at Jumpstart strive to make these crucial five years as enriching as possible. We work for the holistic growth and development of the child.

Montessori method

(Maria Montessori)

Through this method we allow natural development of the children in a well prepared environment with emphasis on independence, freedom within limits, and respect for the children.

Multiple Intelligence Approach

(Howard Gardner)

Play way method

(Friedrich Froebel)

This method is based on the "power of play" and the children's natural curiosity and tendency to "make-believe". Through this method children learn more efficiently and gain more knowledge with our play-based activities such as free play, dramatic play, art, and social games.

Project method

(William H. Kilpatrick)

Through this method we allow the children to explore and experience their environment through the five senses and emphasis is on experiential learning, rather than rote and memorization.

Glenn Doman Method

(Glenn Doman)

We have adopted this method to systematically build language and mathematic skills in children. The learning happens through specific size flash cards.

Courses Offered

360° Program

Academics

Value education

Speech and drama

Sensory lab

Pretend play

Learning tour

60+ Experiential events

Readiness activity

Music and movement

Baby yoga

Social Responsibility

We live in a society and we owe to our society. We are working at the grassroots level and we believe that we can get a change in society by working with young children.

We actively work with ECA which is a non-profit association working at a national level to bring about a change in the quality of care development and learning in early childhood in India. Various workshops, training programs and conferences are conducted through ECA.

We believe in keeping our environment green and clean. We have been planting trees and have been promoting camps to plant more trees.

We believe that water is precious and therefore have invested in rain water harvesting.

We conduct regular health check up and dental check up camps free of charge.

We teach our children about obeying traffic rules and road safety and wish to get a change in the way citizens follow traffic rules.

We are passionate about children and therefore have an array of activities to create social awareness about issues related to children such as nutrition, physical & mental growth & development etc.
